

CIMple™ Shared Branching

It's easier than you think!

- Owned and controlled by credit unions
- Over 6,000 locations
- 24/7 Vcom Kiosks at 7-11
- CIMple 3rd party connectivity
- Turn-key marketing

Shared Branching enhances your credit union's ability to provide extended personal service to your members regardless of where they live, work, or travel. It also exemplifies the credit union difference and the benefits of belonging to a financial institution that collaborates for the benefit of all members. Plus, get the industry's best 3rd party integration tool to help you implement the most innovative technology in the credit union movement.

Your members want convenience. They want branch access where they live, work, and travel. To meet this need you could hire more staff or open more branches. But both of these options require significant, long-term financial commitments and provide relatively limited additional access. Why not implement Shared Branching instead?

What is CIMple Shared Branching?

CIMple Shared Branching is a network created by credit unions, just like yours, who have joined together to share their branch locations so that their members may conduct transactions at any of these shared facilities nationwide. By joining CIMple Shared Branching, your members gain access to over 6,000 C
