

CIMple™ Deposit

It's easier than you think!

Now your online branch can do pretty much everything a physical branch can do, including take check deposits. With CIMple Deposit (from FSCC) and DeposZip (from Vertifi Software LLC), your personal and business members have the ability to scan and deposit checks online, while reducing your integration costs by using the CIMple Shared Branching interface.

CIMple Deposit

It's easier than you think!

When you add DeposZip (powered by CIMple) to your online banking solution, you empower your members to do all their banking from the comfort and convenience of their home or office. Using everyday desktop scanners or a supported smartphone, members simply capture and submit checks, and your staff approves and processes them.

DeposZip® (Powered by CIMple™) Benefits

DeposZip expands your footprint beyond your branch locations. It also protects your existing relationships by improving member satisfaction and convenience. Your members will love not having to worry about business hours and branch locations — especially your business accounts whose demands for convenience and expanded service hours are among the greatest of all.

DeposZip not only works anytime, it works anywhere. As valued members move from your area, you can continue to serve their needs and retain the relationships. In fact, DeposZip expands the adoption of your other online services as more members spend more time online with you.

Capture Checks From Any Scanner or Supported Smartphone

DeposZip works with a variety of smartphones, as well as commercially-available scanners, including specialty scanners for use with high-volume business accounts.

And because DeposZip is a hosted solution, there is no lengthy IT deployment or expensive hardware costs.

Easy to Use, Easy to Manage

DeposZip is designed to be easy to use. The system requires minimum training and provides maximum convenience.

DeposZip uses advanced image capture functionality, image quality, and intelligent amount recognition technology. These features capture, validate, balance, and manage deposit transactions from the moment they are received from your member, until they are posted to your host system by using the CIMple Shared Branching interface.

Credit Union Benefits

- Broader geographical reach and retention
- Easy implementation using CIMple
- Increased online banking traffic
- More satisfied members

Consumer Benefits

- Make deposits from anywhere
- Save time and money
- No expensive hardware or fees
- Great for businesses
